github.com/Kainatnvd

Computer Science graduate specializing in full-stack development and AI-powered applications. Experienced in shipping production-grade conversational AI (chatbots/voicebots), scalable web platforms, and cloud-integrated tools using Python, JavaScript, React, and FastAPI. Combines strong engineering fundamentals with UI/UX sensibility to deliver measurable improvements in automation, usability, and support efficiency.

Experience

Software Engineer Intern | AppRays (LUMS), Lahore

NOVEMBER 2025 – FEBRUARY 2026

- Built and deployed a production-grade AI chatbot and voicebot, automating customer support and cutting average response time by an estimated 40%.
- Developed a responsive corporate website for Sooraj Crop Sciences in **React.js**, collaborating with a 5-person cross-functional team to deliver on schedule.

Customer Service Representative | Downright Printing, New York, USA (Remote)

AUGUST 2023 – PRESENT

- Manage communication for 50+ client accounts and generate qualified leads through proactive outreach, contributing to consistent quarter-over-quarter revenue growth.

UI/UX Designer Intern | Cognorise Infotech, Remote (Lahore)

AUGUST 2024 – SEPTEMBER 2024

- Designed 10+ UI prototypes, dashboards, and branding materials in **Figma**, improving design-to-development handoff efficiency.

Volunteer Intern | Pakistan Crescent Youth Organization (UN-Affiliated), Lahore

SUMMER 2019

- Led social awareness campaigns and raised PKR 37,000 through organized fundraising initiatives.

Skills

Languages: Python • JavaScript • TypeScript • C++

Web & App Development: React • Angular • FastAPI • ASP.NET Core • Node.js • HTML/CSS • Tailwind CSS • Flutter • Firebase

Databases & Tools: PostgreSQL • MongoDB • Firebase • GitHub • Figma • Docker • Canva Pro

AI & NLP: Claude AI • OpenAI Whisper • Google Gemini API • Botpress

Projects

PayTalk – AI-Powered Voice Banking App (Final Year Project)

Python • FastAPI • PostgreSQL • Flutter SDK | 2026

- Built a bilingual (Urdu–English) voice banking app for Raast transfers and balance checks, achieving 92.4% Whisper STT accuracy and 93.1% Gemini NLU accuracy.
- Implemented OTP and CNIC-based multi-factor authentication with AES-256 encryption; delivered as a Flutter app and an integrable SDK.

Snaccify – Smart Food Ordering & Feedback Platform

JavaScript • MongoDB • EmailJS • Vercel | 2025

- Built a full-stack ordering platform with an AI Chatbot (SNACBOT), live cart/billing, and a “Surprise Me” combo-deal feature designed to boost average order value.
- Deployed on Vercel with a MongoDB backend and EmailJS-powered real-time customer reviews.

AI Voicebot/Chatbot & Website – Sooraj Crop Sciences

React.js • JavaScript • Python | 2025 – 2026

- Deployed an NLP-based chatbot/voicebot handling FAQs and product inquiries, reducing manual support workload by an estimated 30%.
- Built a fully responsive corporate website aligned with brand identity and business needs.

Education

2022 – 2026

Bachelor of Science (Computer Science) | Lahore Garrison University, Pakistan

CGPA 3.72 / 4.00

2020 – 2022

A-Levels | DHA Education System, Lahore
